II Covers Commerce Objective Questions Asked In Various Competitive Exams With Answers. In this book, extended case studies of two veteran teachers and their students are combined with the extant research literature to explore current issues of teaching, learning, and testing U.S. history. It is among the first to examine these issues together and in interaction. While the two teachers share several similarities, the teaching practices they construct could not be more different. To explore these differences, the author asks what their teaching practices look like, how their instruction influences their students' understandings of history, and what role statewide exams play in their classroom decisions. History Lessons: Teaching, Learning, and Testing in U.S. High School Classrooms is a major contribution to the emerging body of empirical research in the field of social studies education, chiefly in the subject area of history, which asks how U.S. students make sense of history and how teachers construct their classroom practices. Three case study chapters are paired with three essay review chapters intended to help readers analyze the cases by looking at them in the context of the current research literature. Two concluding chapters

extend the cases and analyses: the first looks at how and why the teachers profiled in this book construct their individual teaching practices, in terms of three distinct but interacting sets of influences--personal, organizational, and policy factors; the second explores the prospects for promoting what the author defines as ambitious teaching and learning. Many policymakers assume that standards-based reforms support the efforts of ambitious teachers, but until we better understand how they and the students in their classes think and act, that assumption is hollow at best. This book is a must have for faculty and students in the field of social studies education, and broadly relevant across the fields of curriculum studies and educational policy.
