The debut book of Jeremy Tankard's high-flying Bird series! Bird wakes up feeling grumpy. Too grumpy to eat or play -- too grumpy even to fly. "Looks like I'm walking today," says Bird. He walks past Sheep, who offers to keep him company. He walks past Rabbit, who also could use a walk. Raccoon, Beaver, and Fox join in, too. Before he knows it, a little exercise and companionship help Bird shake his bad mood. Praised by the Wall Street Journal as "comic perfection," this winsome, refreshingly original picture

book is sure to help kids (and grown-ups) giggle away their grumpies, too! Bird's impeccably crafted, hilarious melodramas continue in the Grumpy Bird board book, Boo Hoo Bird, Hungry Bird, and coming in 2018, Sleepy Bird. Classroom assistants are increasingly relied upon to support the most needy pupils, and they have had significantly less training than their colleagues with qualified teacher status. It is clear that these assistants need some very practical materials. This book provides photocopiable resources so that classroom assistants can get to work. The book covers all they need to know about literacy, it explains in very simple terms what is expected from them and: \*how the National Literacy Strategy works \*how to support reading, writing and spelling \*how to select fiction and non-fiction \*how to help children use computers It also covers issues such as: \*how to help children for whom English is not their first language \*how to help children with special needs \*how to set targets and monitor progress. As well as providing an invaluable manual for assistants, Supporting Literacy will be useful for SENCOs and English Co-ordinators who are training support staff and volunteers in primary schools. Learning Support Assistants and others following recognised courses (eg Specialist Teacher's Assistants) will find the book helpful in the study of children's literacy. Literacy skills are fundamental to all areas of learning in the school curriculum but also have a profound impact on an individual's chances of finding satisfying work in the years beyond school. Reading and Writing Difficulties draws on the latest research from around the world to explain some of the causes of literacy problems and gives practical advice on methods to support students with their own difficulties. Details of additional resources and online links are provided to assist teachers who wish to pursue some of the issues in greater depth. In this book, Falk-Ross and the contributing authors offer their different perspectives on supporting English language learners through specific strategies for assessment and instruction. It presents specific issues and challenges, supportive research and up-to-date information, classroom implications and strategies, and case study applications. Primary-grade teachers face an important challenge: teaching children how to read while

enabling them to build good habits so they fall in love with reading. Many teachers find the independent reading workshop to be the component of reading instruction that meets this challenge because it makes it possible to teach the reading skills and strategies children need and guides them toward independence, intention, and joy as readers. In *Growing Readers*, Kathy Collins helps teachers plan for independent reading workshops in their own classrooms. She describes the structure of the independent reading workshop and other components of a balanced literacy program that work together to ensure young students grow into strong, well-rounded readers. Kathy outlines a sequence of possible units of study for a yearlong curriculum. Chapters are devoted to the individual units of study and include a sample curriculum as well as examples of mini-lessons and reading conferences. There are also four "Getting Ready" sections that suggest some behind-the-scenes work teachers can do to prepare for the units. Topics explored in these units include: print and comprehension strategies; reading in genres such as poetry and nonfiction; connecting in-school reading and out-of-school reading; developing the strategies and habits of lifelong readers. A series of planning sheets and management tips are presented throughout to help ensure smooth implementation. We want our students to learn to read, and we want them to love to read. To do this we need to lay a foundation on which children build rich and purposeful reading lives that extend beyond the school day. The ideas found in *Growing Readers* create the kind of primary classrooms where that happens. *Interactive Literacy: Multimedia Reading* helps teachers to meet the challenge of literacy in the 21st century by embedding ICT into literacy teaching in an engaging and meaningful way. Most students who are deaf or hard of hearing (DHH) struggle with acquiring literacy skills, some as a direct result of their hearing loss, some because they are receiving insufficient modifications to access the general education curriculum, and some because they have additional learning challenges necessitating significant program modifications. Additionally, instructional practices for DHH students tend to be directed toward two sub-populations of DHH students: those with

useable access to sound and those without. Literacy Instruction for Students who are Deaf and Hard of Hearing describes current, evidence-based practices in teaching literacy for DHH students and provides practitioners and parents with a process for determining whether a practice is or is not "evidence-based." Easterbrooks and Beals-Alvarez describe the importance of the assessment process in providing on-going progress monitoring to document students' literacy growth as a primary means to direct the course of instruction. They address the five key areas of instruction identified by the National Reading Panel: phonemic awareness, phonics, fluency, vocabulary, and comprehension. In this concise guidebook, the authors present the role of assessment in the literacy process, an overview of evidence-based practices, and in the absence of such information, those practices supported by causal factors across the National Reading Panel's five areas of literacy. They also review the evidence base related to writing instruction, present case studies that reflect the diversity within the DHH population, and review the challenges yet to be addressed in deaf education.

Strickland, Samuel DeWitt Proctor Professor of Education Emerita, Rutgers "This book encourages and supports leaders as they create bold, thoughtful and empowering pathways for professional development. It is a recipe that has the power to highlight the joy of professional growth and learning for leaders, teachers and students alike. To me, that is truly fabulous." —Jennifer Scoggin, Director of LitLife, Connecticut "The authors address important aspects of the decision-making process, namely how to really know someone or something well before making a choice. Too many of our educational choices are based on outdated or misinformation and this book clearly shows school leaders how to obtain accurate information when creating a cohesive literacy model. This book also takes complex aspects of literacy professional development, such as standards and instructional techniques and breaks them down in clear and applicable ways so that decisions can not just be made but also be implemented." —Gravity Goldberg, Literacy Consultant, Director, Gravity Goldberg LLC In an era of change in education, the time is right to refocus attention on guided reading practices. The Middle Grade Memoir of a Girl Boxer and Future Olympian. In this Lean-In style inspirational memoir, twelve-year-old Jesselyn Silva offers a ringside seat to girl power and what it takes to win in the ring and in life: punch by punch. My Corner of the Ring shows kids what it means to be true to yourself and stick with your dreams even when facing adversity and ridicule. Supported by her single dad, Jesselyn (JessZilla in the ring) first donned her boxing gloves at seven years of age, making

her one of very few female boxers in the country. My Corner of the Ring charts Jesselyn's oft times exhilarating and heartbreaking journey to success in a male dominated sport where she struggles to find partners to spar with and combats the viewpoint that no one wants to see a girl fight. Despite an inhospitable environment, Jesselyn still has her sights set on the Olympics. With the help of her very dad, Pedro, who has instilled in her a strong work ethic, she just might make it. It is an exciting and motivational read that will provide kids with the roadmap and encouragement to accomplish whatever goals they set for themselves. Jesselyn's positive can-do attitude and determination make this a must read.

Major changes continue to occur in medical education. There are increasing external and internal pressures to improve the quality of courses and the teaching performance of individual staff. Since the publication of the first edition of this book in 1983, the Handbook for Medical Teachers has established itself as an ideal resource for both new and established teachers in an area where there is very little other support. It successfully combines basic educational principles with a how-to approach in a very readable way, supported by numerous illustrations and cartoons. This third edition has been extensively revised throughout to reflect the many changes in medical education since the last edition. There is a new chapter on problem-based learning as well as an appendix on how to keep a teaching portfolio as a support for academic promotion or staff appraisal. A Handbook for Medical Teachers is essential reading for all those involved in any area of medical teaching and research.
