The UNECE Convention on Access to Information, Public Participation in Decision-Making and Access to Justice in Environmental Matters – known ubiquitously as the

Aarhus Convention – is having an ever-increasing influence on domestic and EU environmental law and procedure. Recent years have seen a steady flow of case law from the UK courts, the Court of Justice of the European Union (CJEU) and the Aarhus Convention Compliance Committee, a raft of civil procedure reforms in response to concerns about whether the costs rules in domestic environmental litigation are compatible with the Convention and an infraction by the European Commission against the UK alleging various systemic breaches. Even the EU itself has been the subject of a ruling by the Compliance Committee that the CJEU's rules on standing for judicial review of EU legislation are too narrow to comply with the Convention. This book, written by several of the leading experts in the field, provides a comprehensive guide to the implementation of the Convention in each of the UK's jurisdictions, the three pillars of the Convention (access to information, public participation and access to justice) and the mechanisms by which the rights under the Convention can be enforced. Ian Mortimer turns to what is arguably the most-loved period in British history - the Regency, or Georgian England. Ian Mortimer takes us on a thrilling journey to the past, revealing what people ate, drank, and wore; where they shopped and how they amused themselves; what they believed in and what they were afraid of. The past is a foreign country: this is your guidebook. If you could travel back in time, the period from 1660 to 1700 would make one of the most exciting destinations in history. It is the age of Samuel Pepys and the Great Fire of London; bawdy comedy and the libertine court of Charles II — the civil wars are over and a magnificent new era has begun. But what would it really be like to live in Restoration Britain? Where would you stay and what would you eat? How much should you pay for one of those elaborate wigs? Should you trust a physician who advises you to drink fresh cow's urine to cure your gout? Why are boys made to smoke in school? And why are you unlikely to get a fair trial in court? The third volume in the series of Ian Mortimer's bestselling Time Traveller's Guides answers these crucial questions and encourages us to reflect on the customs and practices of daily life. This unique guide not only teaches us about the seventeenth century but makes us look with fresh eyes at the modern world. Designed to be used in the field, the text and photographs describe and illustrate the key features needed to identify a species with confidence, and to separate it from similar, or 'confusion', species. As a general rule, the species accounts follow the taxonomic running order provided by the British Ornithologist's Union (BOU). But for the benefit of the reader, in some instances the running order has been juggled subtly so that potentially confusing species are placed side by side. Throughout the book there are special pages that describe the key features needed for separating different families, and groups of birds that share the same habitat. More than 1,200 photographs are featured and many are seen here for the first time. They have been chosen carefully to show not only important identification features but also to give clues to the usual habitat favoured by the bird, and its typical posture. Annotations highlight key identification features that are discussed in the text. Song and call are useful aids to identification, and reference is made to vocalisation for each species. The average size of each bird is included; in most species this is the length, measured from the tip of the bill to the tip of the tail, but in birds that are seen most frequently in flight (such as raptors), the given measurement is wingspan. Relative abundance maps are shown for every species. The darker shading shows where a species is most abundant, and the lighter shades where it is less so. These are based on the very latest information contained within the BTO's Bird Atlas 2007--11. Taxi rank . . . toad in the hole . . . dustman . . . fancy dress . . . American visitors to London (or viewers of British TV shows) might be confused by these terms. But most Britons would be equally puzzled by words like caboose, bleachers, and busboy. In Divided by a Common Language, Christopher Davies explains these expressions and discusses the many differences in pronunciation, spelling, and vocabulary between British and American English. He compares the customs, manners, and practical details of daily life in the United Kingdom and the United States, and American readers will enjoy his account of American culture as seen through an Englishman's eyes. Davies tops it off with an amusing list of expressions that sound innocent enough in one country but make quite the opposite impression in the other. Two large glossaries help travelers translate from one variety of English to the other, and additional lists explain the distinctive words of Australia, New Zealand, and South Africa.
