Information and Communication Technologies for Agriculture--

Theme IV. Nov 17 2021 This volume is the last (IV) of four under the main themes of Digitizing Agriculture and Information and Communication Technologies (ICT). The four volumes cover rapidly developing processes including Sensors (I), Data (II), Decision (III), and Actions (IV). Volumes are related to digital transformation within agricultural production and provision systems, and in the context of Smart Farming Technology and Knowledge-based Agriculture. Content spans broadly from data mining and visualization to big data analytics and decision making, alongside with the sustainability aspects stemming from the digital transformation of farming. The four volumes comprise the outcome of the 12th EFITA Congress, also incorporating chapters that originated from select presentations of the Congress. The focus in this volume is on the directions of Agriculture 4.0 which incorporates the transition to a new era of action in the Agricultural sector, represented by the evolution of digital technologies in 4 aspects: Big Data, Open Data, Internet of Things (IoT), and Cloud Computing. Under the heading of Action, 14 Chapters investigate the implementation of cutting-edge technologies on real world applications. It will become apparent to the reader that the penetration of ICT in agriculture can result in several benefits related to the sustainability of the sector and to yield the maximum benefits, successful management is required. The entire discussion highlights the importance of proper education in the adoption of innovative technologies starting with the adaptation of educational systems to the new era and moving to the familiarization of farmers to

the new technologies. This book covers topics that relate to the digital transformation of farming. It provides examples and case studies of this transformation from around the world, examines the process of diffusion of digital technologies, and assesses the current and future sustainability aspects of digital agriculture. More specifically, it deals with issues such as: Challenges and opportunities from the transition to Agriculture 4.0 Safety and health in agricultural work automation The role of digital farming on regional-spatial planning The enrollment of Social Media in IoT-based agriculture The role of education in digital agriculture Real-life implementation cases of smart agriculture around the world.

Examination Questions and Answers in Basic Anatomy and Physiology Mar 09 2021 This second edition provides 2400 multiple choice questions on human anatomy and physiology, and some physical science, separated into 40 categories. The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However, not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions have been used in end-of-semester examinations for undergraduate anatomy and physiology courses and as such reflect the focus of these particular courses and are pitched at this level to challenge students that are beginning their training in anatomy and physiology. The question and answer combinations are intended for use by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition and dietetics, health sciences, exercise science, and students taking an anatomy and physiology course as an elective.

Narrative Retellings Oct 16 2021 Narrative Retellings presents pioneering work at the intersection of stylistics and narrative study to provide new insights into the diverse forms of fictional and factual narratives and their retellings. Common types of retelling, such as translation, adaptation, textual intervention and reader responses are reconceptualised in the chapters, and fresh insights are offered into experiences retold as autofiction, witness statements and advertorials on social media. From modernising the most cherished novels of Jane Austen to deciphering conflicting testimonials following the Hillsborough disaster, this volume reveals the complexities involved in all forms of narrative retellings. As such, it makes a valuable contribution to the interdisciplinary study of stylistics and to the understanding of narrative texts.

BUSINESS MANAGEMENT Dec 06 2020 This book is primarily designed for students preparing for various competitive examinations. It will also be helpful for those preparing for midterm exams in schools or universities. The aim of this book is twofold: first, to help the students preparing for competitive examinations, seeking admission to universities or schools, or prepare for job interviews. Second, it will also be helpful for those studying BUSINESS MANAGEMENT. This book contains more than 5070 questions from the core areas of BUSINESS MANAGEMENT. The questions are grouped chapter-wise. There are total 1 chapters, 18 sections and 5070+ MCQ with answers. This reference book provides a single source for multiple choice questions and answers in BUSINESS MANAGEMENT. It is intended for students as well as for developers and researchers in the field. This book is highly useful for faculties and students. One can use this book as a study guide, knowledge test questions bank, practice test kit, quiz book, trivia questions . . . etc. The strategy used in this book is the same as that which mothers and grandmothers have been using for ages to induce kids in the family to sip more soup (or some other nutritious drink). The children are told that some cherries (their favourite noodles or cherries) are hidden somewhere in the bowl, and that serves as an incentive for drinking the soup. In joint families, by the time the children are old enough to know the trick played by their grandma, there is usually another group of kids ready to fall for it! They excite the kids, but the real nutrition lies not in the noodles but in the soup. The problems given in this book are like those noodles/cherries while solving all these problems are nutritious soup. Now it is your choice to drink the nutritious soups or not!!!.

NORCET E Book Sep 22 2019 SGN.The E Book AIIMS-Nursing Officer Recruitment Common Eligibility Test -NORCET Covers Nursing Officer Objective Questions From Various Competitive Exams With Answers. Cognitive Linguistics, Second Language Acquisition, and Foreign Language Teaching Mar 21 2022 This collection of twelve papers demonstrates that the concepts developed within the Cognitive Linguistics movement afford an insightful perspective on several important areas of second language acquisition and pedagogy. In the first part of the book, three papers show how three Cognitive Linguistics constructs provide a useful theoretical frame within which second language acquisition data can be analyzed. First, Talmy's typology of motion events is argued to constitute the base relative to which acquisition discrepancies in motion events are most valuably investigated. Secondly, the notion of "construction" is invoked in order to account for systematic differences between the native and non-native speakers' use of the English verb get. Finally, frequency and similarity effects are shown to play a crucial part in the learning of prepositions in a second language. The second part of the book shows that the key concepts commonly invoked in Cognitive Linguistics analyses allow language teachers to insightfully structure the presentation of problematic material in the foreign language classroom. These concepts include among others polysemy, the figure/ground gestalt, the usage-based conception of grammar, the radial organization of categories, metaphors, and cultural scripts. The Cognitive Linguistics paradigm has already shown its viability to analyze a wide array of linguistic phenomena. This book establishes its relevance in the areas of second language acquisition and language pedagogy. Its intended public is composed of Cognitive Linguists, Second Language Acquisition specialists, as well as foreign language pedagogy researchers, instructors, and students.

The Meaning Of Children Feb 20 2022 As more individuals delay having children or opt for childlessness, the question arises: What value do people place on children in contemporary U.S. society? Dr. Laucks studies this question through a survey designed to elicit attitudes regarding the purpose and desirability of raising children in the context of a depersonalized, fragmented, and alienating society. The survey - of a large group of university graduates - points to marked discrepancies between individual attitudes favoring procreation and parenthood and individual actions that contradict traditional notions. Purported aspirations and goals still include the hope of raising happy, healthy children. Yet, while individually valuing children and family, Americans widely approve of and use contraceptives and other birth control methods, endorse easy dissolution of marriage, and approve of relationships that exclude children. The author examines these diverging attitudes in relation to contemporary and historical sentiments toward the family. Extensive tables display the detailed results of Dr. Laucks's survey, giving demographic information on the respondents, along with their attitudes toward sexual practices, parenthood, child rearing, and the family.

Insurmountable Simplicities Apr 22 2022 Why do mirrors seem to invert left and right but not up and down? How do we know whether strawberries taste the same for everyone? Where is it written that we must observe the law, and if it is not written, why should we observe it? What if we could swap brains-or the rest of our bodies? *Insurmountable Simplicities* is filled with captivating and inventive stories, dialogues, and epistolary exchanges that illuminate the many philosophical conundrums of everyday life. Clear, concise, and intellectually engaging, this internationally acclaimed book covers a range of themes, such as personal identity, causality and responsibility, fortune, the nature of things, the paradoxes of time and space, and the interplay between logic and language, and brilliantly demonstrates that the beauty of philosophy resides in its engagement with the simplicities of the world, insurmountable as they might initially appear.
