Getting started with Fusion 360 Learn how Autodesk® Fusion 360® can help you bring your designs to life. What is Fusion 360? Fusion 360 is a cloud-based CAD/CAM/CAE tool for collaborative product development. Fusion 360 combines fast and easy organic modeling with precise solid modeling, to help you create manufacturable designs. Watch this short video to learn about what you can achieve with Fusion 360. Where your

Fusion 360 data is stored All Fusion 360 design data is stored in the cloud. You can securely access your Fusion 360 data from anywhere. You can also use group projects to control who else can access your design data and collaborate with you. Tip: If you do not have internet access, you can still use Fusion 360 in offline mode. Learn how to work in offline mode. Learn more about design data management in Fusion 360. Design strategies Where Fusion 360 fits in the design process Fusion 360 connects your entire product development process in a single cloud-based platform for Mac and PC. Explore and refine the form of your design with the sculpting, modeling, and generative design tools. Since your Fusion 360 designs are stored and shared with your team in the cloud, you can iterate on your design ideas in real time, which increases team productivity. You can optimize and validate your design with assemblies, joint and motion studies, and simulations. Then communicate your design through photorealistic renderings and animations.
