This in-depth, historical analysis of terrorism investigates the major funding streams of terrorists, insurgents, guerrillas, warlords, militias, and criminal organizations throughout the world as well as the efforts of the international community to thwart their efforts. • Examines the financing of major terrorist organizations such as ISIS, Al Qaeda, Hamas, Hezbollah, the Taliban, and other significant groups • Features maps of key regions and graphs comparing funding streams of various groups • Includes information derived from interviews with expert threat finance practitioners, academics, scholars, and policy professionals • Provides a chronology of critical events A former senior advisor at U.S. Special Operations Command recounts the history of the United States' ongoing battle against al-Qaida, describing investigations conducted by the combined efforts of the CIA, FBI and MI5 and the shifting alliances between terrorist groups. 30,000 first printing. “This is the roadmap out of climate crisis that Canadians have been waiting for.” — Naomi Klein, activist and New York Times bestselling author of *This Changes Everything* and *The Shock Doctrine* • One of Canada’s top policy analysts provides the first full-scale blueprint for meeting our climate change commitments • Contains the results of a national poll on Canadians’ attitudes to the climate crisis • Shows that radical transformative climate action can be done, while producing jobs and reducing inequality as we retool how we live and work. • Deeply researched and targeted specifically to Canada and Canadians while providing a model that other countries could follow Canada needs to reduce its greenhouse gas emissions by 50% to prevent a catastrophic 1.5 degree increase in the earth’s average temperature — assumed by many scientists to be a critical “danger line” for the planet and human life as we know it. It’s 2020, and Canada is not on track to meet our targets. To do so, we’ll need radical systemic change to how we live and work—and fast. How can we ever achieve this? Top policy analyst and author Seth Klein reveals we can do it now because we’ve done it before. During the Second World War, Canadian citizens and government remade the economy by retooling factories, transforming their workforce, and making the war effort a common cause for all Canadians to contribute to. Klein demonstrates how wartime thinking and community efforts can be repurposed today for Canada’s own Green New Deal. He shares how we can create jobs and reduce inequality while tackling our climate obligations for a climate neutral—or even climate zero—future. From enlisting broad public support for new economic models, to job creation through investment in green infrastructure, Klein shows us a bold,

practical policy plan for Canada's sustainable future. More than this: A Good War offers a remarkably hopeful message for how we can meet the defining challenge of our lives. COVID-19 has brought a previously unthinkable pace of change to the world—one which demonstrates our ability to adapt rapidly when we're at risk. Many recent changes are what Klein proposes in these very pages. The world can, actually, turn on a dime if necessary. This is the blueprint for how to do it. Take your e-learning, research, and collaboration experience to the next level. The RAND analyst author of *The Rise of European Security Cooperation* traces the American experience in Afghanistan from the rise of the Taliban to present-day insurgency activities, drawing on new research and declassified documents to contend that a misallocation of resources to Iraq left forces in Afghanistan ineffectual. Reprint. A BOMC selection. What do the pyramids of Egypt really represent? What could have driven so many to so great, and often so dangerous, an effort? Was the motivation religious or practical? Illustrated with more than 300 photographs and drawings, this book presents an original approach to the subject of pyramid building. It reveals the connection between devices that served both a practical need for survival and a spiritual belief in gods and goddesses. It examines Egyptian technologies and techniques from the origins of pyramid development to the step-by-step details of how the ground was leveled, how the site was oriented, and how the stone was raised and placed to meet at a distant point in the sky. Here the author also asks and answers questions virtually ignored for the last century. He discloses, for example, the ancient use of shadows, now denigrated to the ornamental back-yard sundial, but once an important tool for telling the height of an object, geographical directions, the seasons of the year, and the time of day. He also reinterprets the ancient "stretching of the cord" ceremony, which once was thought to have only religious significance but here is shown as the means of establishing the sides of a pyramid. From one of our most trusted counterterrorism experts, a sweeping, insider's account of the decade-long chase for America's deadliest enemy. This landmark history chronicles the dramatic, decade-long war against al Qa'ida and provides a model for understanding the ebb and flow of terrorist activity. Tracing intricately orchestrated terrorist plots and the elaborate, multiyear investigations to disrupt them, Seth G. Jones identifies three distinct "waves" of al Qa'ida violence. As Jonathan Mahler wrote in the *New York Times Book Review*, "studying these waves and the counterwaves that repelled them can tell us a lot about what works and what doesn't when it comes to fighting terrorism." The result is a sweeping, insider's account of what the war has been and what it might become. Most start-ups fail. And they die remarkably young: The typical start-up lasts 20 months and burns through \$1.3 million in financing before closing its doors. So what's the formula for success for those start-ups that make it through the early trials, leveraging their early success into either getting acquired or issuing an IPO (initial public offering)? What are the lessons that first-time entrepreneurs and employees need to know to navigate their way to success? The *Ultimate Start-Up Guide* offers practical advice, insights, lessons, and best practices from the world of start-ups, including: Strategies for hiring and building your team, culture, and values. How to pitch your company, secure funding, and distribute equity. Best practices in launching your business. How venture capitalist investors think, evaluate new companies, and advise entrepreneurs. War stories and red flags from top VC partners and entrepreneurs. Start-ups are a business model and culture of their own, changing the economic landscape as well as the way we live and work. The *Ultimate Start-Up Guide* offers an insider's look at this world. It's a fascinating read for anyone contemplating how to build or participate in a successful start-up. A former senior advisor at U.S. Special Operations Command recounts the history of the United States' ongoing battle against al-Qaida, describing investigations conducted by the combined efforts of the CIA, FBI and MI5 and the shifting alliances between terrorist groups. 30,000 first printing. A *New York Times*, *USA Today*, and *Wall Street Journal* bestseller In this iconic bestseller, popular business blogger and bestselling author Seth Godin proves that winners are really just the best quitters. Godin shows that winners quit fast, quit often, and quit without guilt—until they commit to beating the right Dip. Every new project (or job, or hobby, or company) starts out fun...then gets really hard, and not much fun at all. You might be in a Dip—a temporary setback that will get better if you keep pushing. But maybe it's really a Cul-de-Sac—a total dead end. What really sets superstars apart is the ability to tell the two apart. Winners seek out the Dip. They realize that the bigger the barrier, the bigger the reward for getting past it. If you can beat the Dip to be the best, you'll earn profits, glory, and long-term security. Whether you're an intern or a CEO, this fun little book will help you figure out if you're in a Dip

that's worthy of your time, effort, and talents. The old saying is wrong—winners do quit, and quitters do win. From the *New York Times*-bestselling author Stephen M. Walt, *The Hell of Good Intentions* dissects the faults and foibles of recent American foreign policy—explaining why it has been plagued by disasters like the "forever wars" in Iraq and Afghanistan and outlining what can be done to fix it. In 1992, the United States stood at the pinnacle of world power and Americans were confident that a new era of peace and prosperity was at hand. Twenty-five years later, those hopes have been dashed. Relations with Russia and China have soured, the European Union is wobbling, nationalism and populism are on the rise, and the United States is stuck in costly and pointless wars that have squandered trillions of dollars and undermined its influence around the world. The root of this dismal record, Walt argues, is the American foreign policy establishment's stubborn commitment to a strategy of "liberal hegemony." Since the end of the Cold War, Republicans and Democrats alike have tried to use U.S. power to spread democracy, open markets, and other liberal values into every nook and cranny of the planet. This strategy was doomed to fail, but its proponents in the foreign policy elite were never held accountable and kept repeating the same mistakes. Donald Trump won the presidency promising to end the misguided policies of the foreign policy "Blob" and to pursue a wiser approach. But his erratic and impulsive style of governing, combined with a deeply flawed understanding of world politics, are making a bad situation worse. The best alternative, Walt argues, is a return to the realist strategy of "offshore balancing," which eschews regime change, nation-building, and other forms of global social engineering. The American people would surely welcome a more restrained foreign policy, one that allowed greater attention to problems here at home. This long-overdue shift will require abandoning the futile quest for liberal hegemony and building a foreign policy establishment with a more realistic view of American power. Clear-eyed, candid, and elegantly written, Stephen M. Walt's *The Hell of Good Intentions* offers both a compelling diagnosis of America's recent foreign policy follies and a proven formula for renewed success. The *Global Obama* examines the president's image in five continents and more than twenty countries. It is the first book to look at Barack Obama's presidency and analyze how Obama and America are viewed by publics, governments, and political commentators around world. The author of *Barack Obama in Hawaii and Indonesia: The Making of a Global President* (Top 10 Black History Book) scaled the globe to gather opinions - cultural, historical, and political analyses - about Obama's leadership style. Writers, journalists, psychologists, consultants, and social scientists present their views on Obama's leadership, popularity, and many of the global challenges that still remain unresolved. As a progress report, this is the first book that tries to grasp 'the Obama phenomenon' in totality, as perceived by populations around the world with special focus on America's leadership in the 21st Century. The first version of the WHO Malaria microscopy quality assurance manual (2009) was based on recommendations made at a series of informal consultations organized by WHO particularly a bi-regional meeting of the WHO regional offices for South-East Asia and the Western Pacific in April 2005 in Kuala Lumpur Malaysia followed by informal consultations held in March 2006 and February 2008 in Geneva Switzerland. Subsequently extensive consultations among international malaria experts led to consensus and preparation of the manual. This second version of the Manual is based on the recommendations of experts made at a WHO technical consultation in March 2014 in Geneva Switzerland. The aim of the meeting was to review the experiences of national malaria control programmes (NMCPs) national reference laboratories (NRLs) and technical agencies in using the Manual and country experience in order to improve systems for managing the quality of malaria microscopy. This second version takes into account the many years of experience of several agencies in the various aspects of quality assurance (QA) described in the Manual. In particular the sections on assessment of competence in malaria microscopy are based on use of this method by the WHO regional offices for South-East Asia and the Western Pacific in collaboration with the WHO Coordinating Centre for Malaria in Australia and by the WHO Regional Office for Africa in collaboration with Amref Health Africa. The section on setting up and managing an international reference

malaria slide bank is based on the work of the WHO Regional Office for the Western Pacific in collaboration with the WHO Coordinating Centre for Malaria Diagnosis in the Philippines. The section on proficiency testing for malaria microscopy is based on work in the WHO Regional Office for Africa in collaboration with the National Institute for Communicable Diseases in South Africa and experience in regional initiatives by Amref Health Africa. The section on slide validation is based on work by Médecins sans Frontières and the section on outreach training and supportive supervision (OTSS) is based on work by the President's Malaria Initiative Malaria Care Project Medical Care Development International and Amref Health Africa. The Manual is designed primarily to assist managers of NMCPs and general laboratory services responsible for malaria control. The information is also applicable to nongovernmental organizations (NGOs) and funding agencies involved in improving quality management systems for malaria microscopy. The Manual is not designed for QA of microscopy in research situations such as in clinical trials of new drugs and vaccines or for monitoring parasite drug resistance. It forms part of a series of WHO documents designed to assist countries in improving the quality of malaria diagnosis in clinical settings including the revised training manuals on Basic malaria microscopy (2010) and the Bench aids for malaria microscopy (2010). Higher education helps to improve an individual's quality of life by enabling them to inflate their knowledge and expertise, to grasp abstract concepts and theories, and to raise their awareness of the world and their community, and as such the assurance of quality is becoming more pivotal in the whole education process. There is no simple definition of the concept of quality in education, though numerous models and theories have been devised. Toward Quality Assurance and Excellence of Higher Education is a new episode of the Quality Assurance perception in higher education, which identifies the quality culture and orientation from the beginning, integrating crucial factors to build a "pyramid" of higher education excellence. The book compares concepts from the main theories of Quality Assurance, management and control when they are applied to educational systems in higher education. The book also presents a new model of excellence in higher education. Excellence is an architecture of building blocks that comes with process performance, effectiveness, harmony and collaboration which should be incorporated in a quality-oriented concept of a sustainable excellence of higher education. The model integrates four main facets: the Educational System, Quality Assurance Managing and Control, Strategic Planning and Globalization. Also presented are international "best-practices" in quality assurance in higher education, from Japan and Finland. reviews of the first edition -- `...this is an excellent, comprehensive book and can be highly recommended to those who want an up-to-date reference on steroid analysis.' Analyst From one of basketball's foremost experts in the field of analytics, a fascinating new perspective on how to watch and think about the game. At its core, the goal of any basketball team is relatively simple: take and make good shots while preventing the opponent

from doing the same. But what is a "good" shot? Are all good shots created equally? And how might one identify players who are more or less likely to make and prevent those shots in the first place? The concept of basketball "analytics," for lack of a better term, has been lauded, derided, and misunderstood. The incorporation of more data into NBA decision-making has been credited—or blamed—for everything from the death of the traditional center to the proliferation of three-point shooting to the alleged abandonment of the area of the court known as the midrange. What is beyond doubt is that understanding its methods has never been more important to watching and appreciating the NBA. In *The Midrange Theory*, Seth Partnow, NBA analyst for *The Athletic* and former Director of Basketball Research for the Milwaukee Bucks, explains how numbers have affected the modern NBA game, and how those numbers seek not to "solve" the game of basketball but instead urge us toward thinking about it in new ways. The relative value of Russell Westbrook's triple-doubles Why some players succeed in the playoffs while others don't How NBA teams think about constructing their rosters through the draft and free agency The difficulty in measuring defensive achievement The fallacy of the "quick two" From shot selection to evaluating prospects to considering aesthetics and ethics while analyzing the box scores, Partnow deftly explores where the NBA is now, how it got here, and where it might be going next. This unique reference provides a pragmatic approach to the development of successful commercial immunodiagnostic products based on enzyme immunoassay technology. Presenting both the basic and applied principles, *Enzyme Immunoassays* gathers information on all aspects of this process, from the initial conceptualization to the introduction of the product to the market. "All terrorist groups eventually end. But how do they end? The evidence since 1968 indicates that most groups have ended because they joined the political process (43 percent), or local police and intelligence agencies arrested or killed key members (40 percent). Military force has rarely been the primary reason for the end of terrorist groups, and few groups within this time frame have achieved victory. This has significant implications for dealing with al Qa'ida and suggests fundamentally rethinking post-9/11 U.S. counterterrorism strategy: Policymakers need to understand where to prioritize their efforts with limited resources and attention. The authors report that religious terrorist groups take longer to eliminate than other groups and rarely achieve their objectives. The largest groups achieve their goals more often and last longer than the smallest ones do. Finally, groups from upper-income countries are more likely to be left-wing or nationalist and less likely to have religion as their motivation. The authors conclude that policing and intelligence, rather than military force, should form the backbone of U.S. efforts against al Qa'ida. And U.S. policymakers should end the use of the phrase "war on terrorism" since there is no battlefield solution to defeating al Qa'ida."--BOOK JACKET. Each chapter of this book aims to explore the basic physical and chemical principles involved in the immunoassay techniques discussed. The book also looks at the optimization and limitations of methodology and concludes with a brief overview of the application of the performance of the technology. CONVERGENCE OF DEEP LEARNING IN CYBER-IOT SYSTEMS AND SECURITY In-depth analysis of Deep Learning-based cyber-IoT systems and security which will be the industry leader for the next ten years. The main goal of this book is to bring to the fore unconventional cryptographic methods to provide cyber security, including cyber-physical system security and IoT security through deep learning techniques and analytics with the study of all these systems. This book provides innovative solutions and implementation of deep learning-based models in cyber-IoT systems, as well as the exposed security issues in these systems. The 20 chapters are organized into four parts. Part I gives the various approaches that have evolved from machine learning to deep learning. Part II presents many innovative solutions, algorithms, models, and implementations based on deep learning. Part III covers security and safety aspects with deep learning. Part IV details cyber-physical systems as well as a discussion on the security and threats in cyber-physical systems with probable solutions. Audience Researchers and industry engineers in computer science, information technology, electronics and communication, cybersecurity and cryptography. Drawing from 140 recently declassified documents, this report presents a comprehensive account of the organization, territorial designs, management, personnel policies, and finances of the Islamic State of Iraq and its predecessor, al-Qa'ida in Iraq." The titulary of the ancient Egyptian king was one of the symbols of authority he assumed at his coronation. At first consisting only of the Horus name, the titulary grew to include other phrases chosen to represent the king's special relationship with the divine world. By the Middle Kingdom (late twenty-first century B.C.E.), the full fivefold

titulary was clearly established, and kings henceforth used all five names regularly. This volume includes all rulers' names from the so-called Dynasty 0 (ca. 3200 B.C.E.) to the last Ptolemaic ruler in the late first century B.C.E., offered in transliteration and English translation with an introduction and notes. "An entertaining tale rich in schadenfreude as bad things happen to a hapless billionaire" (Kirkus Reviews, starred review). Jay Gladstone was born to privilege. He is a civic leader and a generous philanthropist, as well as the owner of an NBA team. But in today's New York, even a wealthy man's life can spin out of control, no matter the money or influence he possesses. Jay sees himself as a moral man, determined not to repeat his father's mistakes. He would rather focus on his unstable second marriage and his daughter, Aviva, than worry about questions of race or privilege. However, he moves through a sensitive and aware world: that of Dag Maxwell, the black star forward, and white police officer Russell Plesko, who makes a decision that has resonating consequences—particularly for a DA whose hopes for a future in politics will rest on an explosive prosecution. Set during Barack Obama's presidency, this artful novel illuminates contemporary America and does not shy away from questions about our scalding social divide—why is conversation about race so fraught, to what degree is the justice system impartial, and does great wealth inoculate those who have it?—and explores the aftermath of unforgivable errors and the unpredictability of the court of public opinion. "Greenland takes a Dickensian delight in letting the plot sprawl with parallels, digressions, false leads, and twists." —Kirkus Reviews (starred review) "A wild and funny page-turner of a novel that grabs you and doesn't let go." —Larry David Popular media can spark the national consciousness

in a way that captures people's attention, interests them in history, and inspires them to visit battlefields, museums, and historic sites. This lively collection of essays and feature stories celebrates the novels, popular histories, magazines, movies, television shows, photography, and songs that have enticed Americans to learn more about our most dramatic historical era. From Ulysses S. Grant's Memoirs to Abraham Lincoln: Vampire Hunter, from Roots to Ken Burns's The Civil War, from "Dixie" to "Ashokan Farewell," and from Civil War photography to the Gettysburg Cyclorama, trendy and well-loved depictions of the Civil War are the subjects of twenty contributors who tell how they and the general public have been influenced by them. Sarah Kay Bierle examines the eternal appeal of Gone with the Wind and asks how it is that a protagonist who so opposed the war has become such a figurehead for it. H. R. Gordon talks with New York Times–bestselling novelist Jeff Shaara to discuss the power of storytelling. Paul Ashdown explores ColdMountain's value as a portrait of the war as national upheaval, and Kevin Pawlak traces a shift in cinema's depiction of slavery epitomized by 12 Years a Slave. Tony Horwitz revisits his iconic Confederates in the Attic twenty years later. The contributors' fresh analysis articulates a shared passion for history's representation in the popular media. The variety of voices and topics in this collection coalesces into a fascinating discussion of some of the most popular texts in the genres. In keeping with the innovative nature of this series, web-exclusive material extends the conversation beyond the book.
